with similar functions
(banner, sales, bills
checking...)

In general

◀ A. The results:

- Basically, the components of the website have been developed according to the right route, with high practical applicability.
- Get the first step of web application development.
- Basic web programming with PHP and MySQL.
- Understand the working process of the website.
- Built a fairly complete database system.

B. Restricts:

- There are still a few places where the function is not complete.
- Missing a few essential functions for a website.
- The site is relatively small in size.
- The interface is not beautiful yet.

C. Development:

- Fix the above disadvantages.
- Learn and improve the interface more eye-catching.
- Optimize database.
- Research website security vulnerabilities.
- Optimize the functions of the system to better meet the needs of users.

*Thank
you!*
